**CIRCULATED  
BEFORE THE  
MEETING**

**REPORT of  
DIRECTOR OF STRATEGY, PERFORMANCE AND GOVERNANCE**

to  
**NORTH WESTERN AREA PLANNING COMMITTEE  
2 SEPTEMBER 2019**

**MEMBERS' UPDATE**

**AGENDA ITEM NO. 5**

<b>Application Number</b>	<b>19/00728/FUL</b>
<b>Location</b>	Land Opposite Bluebell Barn Lower Burnham Road Latchingdon
<b>Proposal</b>	Development of a farm shop incorporating a seafood counter and removal of existing building
<b>Applicant</b>	Mr M Lancaster
<b>Agent</b>	Mrs Elizabeth Milne - Whirledge And Nott
<b>Target Decision Date</b>	23.08.2019
<b>Case Officer</b>	Hannah Bowles
<b>Parish</b>	Cold Norton
<b>Reason for Referral to the Committee / Council</b>	Member call in by Councillor White due to public interest (prominent location).

**7.3 Internal Consultees**

<b>Name of Internal Consultee</b>	<b>Comment</b>	<b>Officer Response</b>
Environmental Health	No objection subject to conditions.	The recommended conditions which are considered reasonable and necessary are set out below.

**8. Proposed Conditions**

11. No development works above ground level shall occur until details of the surface water drainage scheme to serve the development shall be submitted to and agreed in writing by the local planning authority. The agreed scheme shall be implemented prior to the first occupation of the development. The scheme shall ensure that for a minimum:

- 1) The development should be able to manage water on site for 1 in 100 year events plus 40% climate change allowance.
- 2) Run-off from a greenfield site for all storm events that have a 100% chance of occurring each year (1 in 1 year event) inclusive of climate change should be no

Agenda Item no. 5

higher than 10/l/s and no lower than 1/l/s. The rate should be restricted to the 1 in 1 greenfield rate or equivalent greenfield rates with long term storage (minimum rate 1l/s) or 50% betterment of existing run off rates on brownfield sites (provided this does not result in a runoff rate less than greenfield) or 50% betterment of existing run off rates on brownfield sites (provided this does not result in a runoff rate less than greenfield).

You are advised that in order to satisfy the soakaway condition the following details will be required:- details of the area to be drained, infiltration rate (as determined by BRE Digest 365), proposed length, width and depth of soakaway, groundwater level and whether it will be rubble filled.

Where the local planning authority accepts discharge to an adopted sewer network you will be required to provide written confirmation from the statutory undertaker that the discharge will be accepted.

Reason: To ensure that the surface water drainage scheme is adequate to serve the development in accordance with Policy D2 of the Maldon District Local Development Plan.

12. No development works above ground level shall occur until details of the foul drainage scheme to serve the development shall be submitted to and agreed in writing by the local planning authority. The agreed scheme shall be implemented prior to the first occupation of the development.

Reason: To ensure that the foul drainage scheme is adequate to serve the development in accordance with Policy D2 of the Maldon District Local Development Plan.

13. Should the existence of any contaminated ground or groundwater and/or hazardous soil gases be found that were not previously identified or not considered in a scheme agreed in writing with the Local Planning Authority, it must be reported in writing immediately and a risk assessment of the site shall be undertaken and a scheme to bring the site to a suitable condition shall be submitted to and agreed in writing with the Local Planning Authority. A "suitable condition" means one in that represents an acceptable risk to human health, the water environment, property and ecosystems and scheduled ancient monuments and cannot be determined as contaminated land under Part 2A of the Environmental Protection Act 1990 now or in the future.

The work will be undertaken by a competent person in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination (CLR 11), the Essex Contaminated Land Consortium's Land Contamination Technical Guidance For Applicants and Developers and current UK best-practice guidance and policy.

Reason:

14. No extraction or ventilation equipment shall be installed or fitted to any part of the building except in accordance with a scheme to be submitted to and approved in writing by the local planning authority. The scheme as approved shall be installed and retained as such thereafter.

Reason: In order to ensure the appropriate use of the site and to protect the amenities of neighbouring residents in accordance with policies D1 and D2 of the Maldon District Local Development Plan.

15. No works above ground level shall occur until details of all external illumination of the site including the luminance and spread of light and the design and specification of the light fittings shall be submitted to and approved in writing by the local planning authority. All illumination within the site shall be retained in accordance with the approved details and retained as such thereafter.

Reason: To protect the visual amenity of the rural area in accordance with Policies D1 and D2 of the Maldon District Local Development Plan.

### **INFORMATIVES**

3. The Applicant is advised to consult Environment Services on any requirements we may have regarding Food Safety and Health & Safety matters at the premises. New food business will need to register with Environment Services 28 days before it commences operation and comply with EC Regulation 852/2004.
4. The applicant should ensure the control of nuisances during construction works to preserve the amenity of the area and avoid nuisances to neighbours:
  - a) No waste materials should be burnt on the site, instead being removed by licensed waste contractors;
  - b) No dust emissions should leave the boundary of the site;
  - c) Consideration should be taken to restricting the duration of noisy activities and in locating them away from the periphery of the site;
  - d) Hours of works: works should only be undertaken between 0730 hours and 1800 hours on weekdays; between 0800 hours and 1300 hours on Saturdays and not at any time on Sundays and Public Holidays.

If it is known or there is the likelihood that there will be the requirement to work outside of these hours or there will be periods where there will be excessive noise that will significantly impact on sensitive receptors Environmental Health at Maldon District Council must be notified prior to the works as soon as is reasonably practicable. The developer is advised to consult nearby sensitive noise premises and may be advised to apply for a Prior Consent under Section 61 of the Control of Pollution Act 1974.

If it is known or there is the likelihood that there will be the requirement to work outside of these hours or there will be periods where there will be excessive noise that will significantly impact on sensitive receptors Environmental Health at Maldon District Council must be notified prior to the works as soon as is reasonably practicable. The developer is advised to consult nearby sensitive noise premises and may be advised to apply for a Prior Consent under Section 61 of the Control of Pollution Act 1974.

Care must be taken to prevent the pollution of ground and surface waters. This will include during works and the location of any hazardous materials including fuel from vehicles and equipment.

Where any soils that are known to be contaminated are being excavated or

exposed a site waste plan must be prepared in order to store treat and dispose of the materials in accordance with the waste duty of care. It is recommended that advice is sought from the Environment Agency on this matter.

Where there is requirement for dewatering the site the relevant consent must be sought from the Environment Agency.

Where there is a requirement to obstruct or alter watercourses a consent under section 23 of the Land Drainage Act must be obtained from Essex County Council.

5. When a sewage treatment plant or septic tank is installed the applicant must ensure that the plant and receiving watercourse complies with DEFRA's general binding rules. Please note that if the general binding rules cannot be complied with you may need to apply for an Environmental Permit to use the system. Please see [www.gov.uk](http://www.gov.uk) for more information on General binding rules for small sewage discharges.
6. It is recommended that the developer seeks to discharge conditions at the earliest opportunity and in many respects it would be logical to do so before development commences. This is particularly the case with conditions which begin with the wording "no development works above ground level shall occur until..." because this will help to ensure that the developer does not go to the risk of incurring costs from commencing development and then finding issues which are difficult to comply with or which may then require the correction of works that have been undertaken.
